## product data

## Selection Data

GENERIC TYPE : Modified epoxy-polyamide. Part A and Part B mixed prior to application.

GENERAL PROPERTIES : High build epoxy coating for sealing and surfacing irregular cementitious surfaces. Particularly recommended for nuclear plants where concrete surfaces must be prepared for ease of decontamination.

RECOMMENDED USES : As a primer-surfacer on concrete under Carboguard $890 \mathrm{~N}(\mathrm{~K})$, Phenoline 373 Finish and other Carboline topcoats as recommended.
Tested for Nuclear service Level I. (Approved for APR-1400)
NOT RECOMMENDED FOR : Immersion service without recommended topcoats.

CHEMICAL RESISTANCE GUIDE : (Consult topcoat for Chemical Resistance Guide)

| Exposure | Splash \& Spillage |
| :--- | :---: |
| Acids | Very Good |
| Alkalies | Excellent |
| Solvents | Excellent |
| Salt | Excellent |
| Water | Excellent |

TEMPERATURE RESISTANCE : (Non-immersion)
Continuous : $200^{\circ} \mathrm{F}\left(93^{\circ} \mathrm{C}\right)$
Non-continuous : $300^{\circ} \mathrm{F}\left(149{ }^{\circ} \mathrm{C}\right)$

FLEXIBILITY : Very Good
WEATHERING: Good (chalks, discolors)
ABRASION RESISTANCE : Very Good
SUBSTRATES : Concrete, or other surfaces as recommended.

TOPCOAT REQUIRED : May be topcoated with catalyzed epoxies, modified phenolics, modified polyurethanes or others as recommended. Carboguard 890 N or Phenoline 373 Finish is normally used for nuclear application. Other acceptable topcoats are Phenoline 300 Finish or Phenoline 302.

COMPATIBILITY WITH OTHER COATINGS : Should be applied directly to concrete substrate or over Carboline 1340 Clear, Carboguard 1340 N if a curing compound is desired.

## Specification Data

THEORETICAL SOLIDS CONTENT OF MIXED MATERIAL :
$97 \% \pm 2 \%$

## RECOMMENDED DRY FILM THICKNESS PER COAT :

$10-60$ mils as required.
Typical average is 20 mils $(500 \mu)$
THEORETICAL COVERAGE PER MIXED GALLON :*
1556 mil sq. ft. ( 38.8 sq. m/l @ $25 \mu$ )
78 sq. ft. at 20 mils ( 1.9 sq. m/l @ $500 \mu$ )
*NOTE : Material losses during mixing and application will vary and must be taken into consideration when estimating job requirements.

SHELF LIFE : 24 months minimum

COLORS : Off-white

GLOSS : Low

## Ordering Information

Prices may be obtained from Carboline Sales Representative or Main Office. Terms-Net 30 days.
APPROXIMATE SHIPPING WEIGHT :

SURFACE PREPARATIONS : Remove any oil or grease from surface to be coated with clean rags soaked in Carboline Thinner\# 2 or toluol.

Concrete : Concrete floors should be at least as rough as medium grit sandpaper. The surface should be free of laitance. This can be accomplished by finishing technique, acid etch or mechanical abrasion. Concrete walls normally require only vacuuming or air blow-off. Do not coat concrete treated with hardening solutions (except for Carboline 1340 Clear) unless test patch indicates satisfactory adhesion. Do not apply coating unless concrete has cured at least 28 days @ $70^{\circ} \mathrm{F}\left(21^{\circ} \mathrm{C}\right)$ and $50 \% \mathrm{RH}$ or equivalent.

MIXING : Mix separately, then combine and mix in the following proportions:

|  |  | 2 Gal. Kit | 10 Gal. Kit |
| :---: | :---: | :---: | :---: |
| Carboline 195N(K) | Part A | 1 Gallon | 5 Gallon |
| Carboline 195N(K) | Part B | 1 Gallon | 5 Gallon |

Thin up to $12 \%$ by volume with Carboline Thinner \#2.
POT LIFE : $1-1 / 2$ hours at $75^{\circ} \mathrm{F}\left(24^{\circ} \mathrm{C}\right)$ and less at higher temperatures. Pot life ends when coating becomes too viscous to use.

## APPLICATION TEMPERATURES :

|  | Material | Surfaces |
| :---: | :---: | :---: |
| Normal | $50-85^{\circ} \mathrm{F}\left(10-29^{\circ} \mathrm{C}\right)$ | $65-75^{\circ} \mathrm{F}\left(16-24^{\circ} \mathrm{C}\right)$ |
| Minimum | $39^{\circ} \mathrm{F}\left(4^{\circ} \mathrm{C}\right)$ | $41^{\circ} \mathrm{F}\left(5^{\circ} \mathrm{C}\right)$ |
| Maximum | $90^{\circ} \mathrm{F}\left(32^{\circ} \mathrm{C}\right)$ | $104{ }^{\circ} \mathrm{F}\left(40^{\circ} \mathrm{C}\right)$ |
|  | Ambient | Humidity |
| Normal | $60-75^{\circ} \mathrm{F}\left(16-24^{\circ} \mathrm{C}\right)$ | 30-70\% |
| Minimum | $41^{\circ} \mathrm{F}\left(5^{\circ} \mathrm{C}\right)$ | 0\% |
| Maximum | $104^{\circ} \mathrm{F}\left(40^{\circ} \mathrm{C}\right)$ | 90\% |
| Do not apply when the surface temperature is less than $5^{\circ} \mathrm{F}$ $\left(3^{\circ} \mathrm{C}\right)$ above the dew point. |  |  |
| Special thinning and application techniques may be required above or below normal conditions. |  |  |
| The follo equivalent | ipment has been t may be substitut | suitable, however |

Conventional : Not recommended.

BRUSH OR ROLLER : Thin up to $25 \%$ by volume per gallon with Carboline \#2. Brush only for touch-up.

ROLLER : Useful where spraying is impractical. Immediately after rolling, squeegee surfacer into all holes. Apply second coat at full thickness.

SQUEEGEE : Squeegee in an upward motion filling in all porosities. A second coat may be necessary if the surface is extremely rough. Thin up to $12 \%$ by volume with Carboline \#2.

## DRYING TIMES :

To Recoat : May be recoated with itself as soon as firm generally allowed to cure overnight.

To Topcoat :

| Temperature | At $\mathbf{2 0}$ Mils* |
| :---: | :---: |
| $41^{\circ} \mathrm{F}\left(5^{\circ} \mathrm{C}\right)$ | 5 days |
| $50^{\circ} \mathrm{F}\left(10^{\circ} \mathrm{C}\right)$ | 3 days |
| $60^{\circ} \mathrm{F}\left(16^{\circ} \mathrm{C}\right)$ | 2.5 days |
| $75^{\circ} \mathrm{F}\left(24^{\circ} \mathrm{C}\right)$ | 2 day |
| $90^{\circ} \mathrm{F}\left(32^{\circ} \mathrm{C}\right)$ | 1 day |

* Carboline $195 \mathrm{~N}(\mathrm{~K})$ which has been applied at thicknesses greater than 20 mils will require longer cure times, especially if applied thinned.

NOTE : For exterior exposures, protect from exposure to sunlight and topcoat as soon as properly cured. Sunlight will cause discoloration which must be removed prior to topcoating. If exposed to sunlight, the discoloration must be removed by wiping with Carboline Surface Preparation \#1 before recoating.

CLEAN UP : Use Carboline Thinner\#2 or xylol.
STORAGE CONDITIONS : (store indoors)
Temperature : $40-100^{\circ} \mathrm{F}\left(4-38^{\circ} \mathrm{C}\right)$
Humidity : 0-95\%

For more detailed information, please consult specific Carboline 195 Surfacer N(K) Application Instructions.
